Placing the Toolkit Toolbar to the Right of the Table of Contents in ArcGis 10

You can pin the Toolbars in ArcGIS 10 to anywhere outside the map view, or you can have them floating in the map view if desired.

To place the Toolkit Toolbar to the right of the Table of Contents (the default location in Toolkit 5.0/ArcGIS 9), do the following and refer to the figure below:

1. Click on the Toolkit Toolbar button on the command ribbon.
2. When the Toolbar opens, left click on the top of the toolbar in the header region, and hold to drag it onto the map view.
3. Blue arrows will appear and you can drag the Toolbar to one of these arrows to pin the Toolbar where you want it.
4. After you pin the Toolbar, it will be in this location when you open ArcGIS again.

 If the Toolkit Toolbar is already open in your ArcGIS but not located where desired, just follow the steps above, starting with Step 2. The same process works for any Toolbars.
